

Blue Cross Blue Shield of North Carolina Preventive Drug List – Generics Only

A drug is considered to be used for preventive purposes if it is being prescribed primarily (1) to prevent the symptomatic onset of a condition in a person who has developed risk factors for a disease that has not yet become clinically apparent or (2) to prevent recurrence of a disease or condition from which the patient has recovered. A drug is not considered preventive if it is being prescribed to treat an existing symptomatic illness, injury or condition.
