Next Review: 6/2010

Description of Procedure or Service

Functional Capacity Assessment is a comprehensive, objective testing of a person's abilities in work related functional tasks. At times, it is used as a preliminary test to determine functional status and capabilities prior to beginning a Work Hardening Program.

Work Hardening is a highly specialized rehabilitation program. It commonly begins following traditional rehabilitation therapies. Its goal is to simulate workplace activities and surroundings in a monitored environment to enable the patient to return to work. These programs may be developed and carried out by an occupational therapist and/or a physical therapist. The goal is to create an environment in which returning workers can rebuild psychological self confidence and physical reconditioning by imitating their customary work routine.

Policy

BCBSNC **will** provide coverage for the Functional Capacity Assessment when it is determined to be medically necessary because the medical criteria and guidelines shown below are met.

BCBSNC **will not** provide coverage for a Work Hardening Program because it is not considered medically necessary. It is intended for the purpose of conditioning for return to work, rather than treatment for a medical condition. (Effective for dates of service on and after 2/19/97.)

Benefits Application

Please refer to Certificate for availability of benefit. This policy relates only to the services or supplies described herein. Benefits may vary according to benefit design, therefore certificate language should be reviewed before applying the terms of the policy.

See Professional Services, see statements related to medical necessity.

When Functional Capacity Assessment and Work Hardening are covered

1. Benefits for Functional Capacity Assessment are limited to situations that meet the following criteria:
 - a. The evaluation is designed to determine return to work capabilities following a defined injury or following a medically necessary rehabilitation;
 - b. The evaluation is structured to answer a specific question or questions about the worker's perfor-

Policy: Functional Capacity Assessment and Work Hardening

- mance abilities. The answer to the question(s) must be addressed in the evaluation report.
- c. Reported results must be compared to meaningful standardized norms; and
 - d. The Functional Capacity Performance must be performed by a qualified provider.
2. Work Hardening - Not applicable.

When Functional Capacity and Work Hardening are not covered

Work Hardening is not covered. It is not considered medically necessary because it is not intended to treat a medical condition.

Functional Capacity Assessment is not covered when the criteria cited above are not met.

Functional Capacity Assessment is not eligible for benefits for workers compensation related evaluations.

Functional Capacity Assessment is not eligible for benefits when done solely for occupational evaluation without preceding injury or illness.

Policy Guidelines

Benefits are limited to two hours per date of service for Functional Capacity Assessment.

Functional Capacity Assessment is limited to one assessment every 12 months. However, there may be cases that warrant a repeat Functional Capacity Assessment in less than 12 months. These cases will be reviewed individually based on individual client/patient objective data compared to standardized norms.

Billing/Coding/Physician Documentation Information

This policy may apply to the following codes. Inclusion of a code in this section does not guarantee that it will be reimbursed. For further information on reimbursement guidelines, please see Administrative Policies on the Blue Cross Blue Shield of North Carolina web site at www.bcbsnc.com. They are listed in the Category Search on the Medical Policy search page.

Applicable codes: 97545, 97546, 97750

BCBSNC may request medical records for determination of medical necessity. When medical records are requested, letters of support and/or explanation are often useful, but are not sufficient documentation unless all specific information needed to make a medical necessity determination is included.
