

BlueMedicare RxSM

2008 Medicare Prescription Drug Formulary

(Comprehensive list of
covered drugs)

**PLEASE READ: THIS DOCUMENT
CONTAINS INFORMATION ABOUT THE
DRUGS WE COVER IN THIS PLAN.**

Note to existing members: This formulary has changed since last year. Please review this document to make sure that it still contains the drugs you take.

What is the Blue Medicare Rx Formulary?

A formulary is a list of covered drugs selected by Blue Medicare Rx in consultation with a team of health care providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. Blue Medicare Rx will generally cover the drugs listed in our formulary as long as the drug is medically necessary, the prescription is filled at a Blue Medicare Rx network pharmacy, and other plan rules are followed. For more information on how to fill your prescriptions, please review your Evidence of Coverage.

Can the Formulary change?

Generally, if you are taking a drug on our 2008 formulary that was covered at the beginning of the year, we will not discontinue or reduce coverage of the drug during the 2008 coverage year except when a new, less expensive generic drug becomes available or when new adverse information about the safety or effectiveness of a drug is released. Other types of formulary changes, such as removing a drug from our formulary, will not affect members who are currently taking the drug. It will remain available at the same cost-sharing for those members taking it for the remainder of the coverage year. We feel it is important that you have continued access for the remainder of the coverage year to the formulary drugs that were available when you chose our plan, except for cases in which you can save additional money or improve the safety of your drugs.

If we remove drugs from our formulary or add prior authorization, quantity limits and/or step therapy restrictions on a drug, we must notify affected members of the change at least 60 days before the change becomes effective, or at the time the member requests a refill of the drug, at which time the member will receive a 60-day supply of the drug. If the Food and Drug Administration deems a drug on our formulary to be unsafe or the drug's manufacturer removes the drug from the market, we will immediately remove the drug from our formulary and provide notice to members who take the drug. The enclosed formulary is current as of December 2007. To get updated information about the drugs covered by Blue Medicare Rx, please visit our Web site at www.bcbsnc.com/member/medicare or call Customer Service at 1-888-247-4142, 7 days a week, 8 a.m. to 8 p.m. TTY/TDD users should call 1-888-247-4145.

How do I use the Formulary?

There are two ways to find your drug within the formulary:

Medical Condition

The formulary begins on page 3. The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category, "Cardiovascular Agents". If you know what your drug is used for, look for the category name in the list that begins on page 3. Then look under the category name for your drug.

Alphabetical Listing

If you are not sure what category to look under, you should look for your drug in the Index that begins on page 41. The Index provides an alphabetical list of all of the drugs included in this document. Both brand-name drugs and generic drugs are listed in the Index. Look in the Index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the Index and find the name of your drug in the first column of the list.

What are generic drugs?

Blue Medicare Rx covers both brand-name drugs and generic drugs. A generic drug has the same active ingredient as the brand name drug. Generic drugs usually cost less than brand name drugs and are approved by the Food and Drug Administration (FDA).

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** Blue Medicare Rx requires you [or your physician] to get prior authorization for certain drugs. This means that you will need to get approval from Blue Medicare Rx before you fill your prescriptions. If you don't get approval, Blue Medicare Rx may not cover the drug.
- **Quantity Limits:** For certain drugs, Blue Medicare Rx limits the amount of the drug that Blue Medicare Rx will cover. For example, Blue Medicare Rx provides 9 tablets per prescription for Imitrex 100mg. This may be in addition to a standard one month or three month supply.

You can find out if your drug has any additional requirements or limits by looking in the formulary that begins on page 3.

You can ask Blue Medicare Rx to make an exception to these restrictions or limits. See the section, “How do I request an exception to the Blue Medicare Rx formulary?” on page d for information about how to request an exception.

What if my drug is not on the Formulary?

If your drug is not included in this formulary, you should first contact Customer Service and ask if your drug is covered. If you learn that Blue Medicare Rx does not cover your drug, you have two options:

- You can ask Customer Service for a list of similar drugs that are covered by Blue Medicare Rx. When you receive the list, show it to your doctor and ask him or her to prescribe a similar drug that is covered by Blue Medicare Rx.
- You can ask Blue Medicare Rx to make an exception and cover your drug. See below for information about how to request an exception.

NOTE: Due to a change in Medicare, most Medicare Drug Plans no longer cover erectile dysfunction (ED) drugs like Viagra, Cilais, Levitra, and Caverject. For more information, you can contact Customer Service.

How do I request an exception to the Blue Medicare Rx Formulary?

You can ask Blue Medicare Rx to make an exception to our coverage rules. There are several types of exceptions that you can ask us to make.

- You can ask us to cover your drug even if it is not on our formulary.
- You can ask us to waive coverage restrictions or limits on your drug. For example, for certain drugs, Blue Medicare Rx limits the amount of the drug that we will cover. If your drug has a quantity limit, you can ask us to waive the limit and cover more.

Generally, Blue Medicare Rx will only approve your request for an exception if the alternative drugs included on the plan’s formulary or additional utilization restrictions would not be as effective in treating your condition and/or would cause you to have adverse medical effects.

You should contact us to ask us for an initial coverage decision for a formulary or utilization restriction exception. When you are requesting a formulary or utilization restriction exception you should submit a statement from your physician supporting your request. Generally, we must make our decision within 72 hours of getting your prescribing physician's supporting statement. You can request an expedited (fast) exception if you or your doctor believe that your health could be seriously harmed by waiting up to 72 hours for a decision. If your request to expedite is granted, we must give you a decision no later than 24 hours after we get your prescribing physician's supporting statement.

What do I do before I can talk to my doctor about changing my drugs or requesting an exception?

As a new or continuing member in our plan you may be taking drugs that are not on our formulary. Or, you may be taking a drug that is on our formulary but your ability to get it is limited. For example, you may need a prior authorization from us before you can fill your prescription. You should talk to your doctor to decide if you should switch to an appropriate drug that we cover or request a formulary exception so that we will cover the drug you take. While you talk to your doctor to determine the right course of action for you, we may cover your drug in certain cases during the first 90 days you are a member of our plan.

For each of your drugs that is not on our formulary or if your ability to get your drugs is limited, we will cover a temporary 30-day supply (unless you have a prescription written for fewer days) when you go to a network pharmacy. After your first 30-day supply, we will not pay for these drugs, even if you have been a member of the plan less than 90 days.

If you are a resident of a long-term care facility, we will cover a temporary 31-day transition supply (unless you have a prescription written for fewer days). We will cover more than one refill of these drugs for the first 90 days you are a member of our plan. If you need a drug that is not on our formulary or if your ability to get your drugs is limited, but you are past the first 90 days of membership in our plan, we will cover a 31-day emergency supply of that drug (unless you have a prescription for fewer days) while you pursue a formulary exception.

Exclusions and Limitations

- This plan uses a prescription drug formulary. Benefits are limited to the drugs on this formulary unless an exception is approved by the plan.
- Drugs that are excluded include:
 - Drugs used for anorexia, weight loss, or weight gain
 - Drugs used to promote fertility
 - Drugs used for cosmetic purposes or hair growth

- Drugs used for the symptomatic relief of cough and colds
 - Prescription vitamins and mineral products, except prenatal vitamins and fluoride preparations
 - Non-prescription drugs
 - Inpatient drugs
 - Barbiturates (sleeping pills)
 - Benzodiazepines (central nervous system depressants)
 - Drugs used to treat sexual or erectile dysfunction
- Certain drugs will have maximum quantity limits.
 - Certain drugs require prior authorization.
 - Drugs covered by Medicare Part B are not payable as Part D benefits. (Refer to your Medicare Part B coverage documents for Part B drug coverage)
 - Members must use network pharmacies to receive full benefits.
 - Drug benefits or services not described in the plan formulary or the Evidence of Coverage, or not required by law or regulations, are not covered.
 - Prescriptions filled by pharmacies outside the United States, even for a medical emergency are not covered.
 - Cosmetic products, or any drug used for cosmetic purposes (such as Rogaine, Renova, Propecia, Avage, Botox Cosmetic, Vaniqa) are not covered
 - Over-the-counter (OTC) medications and any prescription medication that contains the same active ingredient(s) as an existing over-the-counter medication are not covered.
 - Replacement of lost or stolen prescriptions are not covered.
 - Prescriptions filled prior to effective date of coverage or after disenrollment date are not covered.
 - Enhanced Plan Only – In the coverage gap, coverage is limited to generic drugs. (With Standard Plan, there is no drug coverage in the coverage gap)
 - Coverage is not available for refill medications before 75% of the time period for the supply has passed. For example, if the prescription is written for a 30-day supply, then you may obtain a refill beginning on the 23rd day.
 - An exception request for drugs on the Brand Name or Specialty Tiers to be paid at the generic cost sharing level is not permissible under this plan.

- An exception request for a Tier 3 (Specialty Tier) drug to be paid at the brand or generic cost sharing level is not permissible under this plan.
- Drugs with Quantity Limitations may not be refilled until 100% of the time period for the supply has passed. For example, if the prescription is written for a supply of 10 tablets to be used in a 30-day period, then you may obtain a refill beginning on the 31st day.
- A Medicare beneficiary must be entitled to Part A and enrolled in Part B to enroll in a Medicare Advantage plan.
- In order to enroll in the Blue Medicare Rx, you must reside within North Carolina. If you are in prison, you cannot join this plan.
- After the initial enrollment period, you may not be able to switch plans until the next open enrollment period.
- If you are eligible for Part D, and don't sign up in your initial enrollment period, you may have to pay more if you sign up later, due to a Medicare late enrollment penalty.
- The plan's contract may be canceled by either the plan or the Centers for Medicare & Medicaid Services.
- Members enrolled under this plan may not have drug coverage through both a Medicare Part D prescription drug plan and a Medicare supplemental plan.
- Plan benefits and premium are subject to change annually.
- All claims must be received within 12 months of the fill date or 3 months after benefit period end date, whichever is earliest. For example, if a drug is purchased on January 31, 2008, the claim must be received no later than January 31, 2009. However, if a drug is purchased on May 31, 2008, the claim must be received no later than March 31, 2009. Claims received after this time frame will not be eligible for coverage.

For more information

For more detailed information about your Blue Medicare Rx prescription drug coverage, please review your Evidence of Coverage and other plan materials.

If you have questions about Blue Medicare Rx, please call Customer Service at 1-888-247-4142, 7 days a week, 8 a.m. to 8 p.m.. TTY/TDD users should call 1-888-247-4145.) Or visit www.bcbsnc.com/member/medicare.

If you have general questions about Medicare prescription drug coverage, please call Medicare at 1-800-MEDICARE (1-800-633-4227) 24 hours a day/7 days a week. TTY/TDD users should call 1-877-486-2048. Or, visit www.medicare.gov.

Blue Medicare Rx Formulary

The formulary that begins on the next page provides coverage information about some of the drugs covered by Blue Medicare Rx. If you have trouble finding your drug in the list, turn to the Index that begins on page 41.

The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., PROZAC) and generic drugs are listed in lower-case italics (e.g., *fluoxetine*).

The information in the Requirements/Limits column tells you if Blue Medicare Rx has any special requirements for coverage of your drug.

- QL means Quantity Limits apply
- (*) means these brand name drugs have a generic equivalent available in some or all dosage forms.
- DC means Part D coverage is applicable only if the agent is not eligible for coverage under Part B based on Medicare guidelines.
- PA means prior approval may be required; Part D coverage is applicable only if the agent is not eligible for coverage under Part B.

The following tier levels refer to the level of coverage for each medication:

- Tier 1 includes covered generic medications.
- Tier 2 includes covered brand medications.
- Tier 3 includes medications which are typically prescribed by a specialist, have unique uses, or may require special dosing or administration, and are generally more costly than other drugs.
