

DENTAL BLUE FOR INDIVIDUALS Benefit Summary

Value 1500 PPO Plan

Here's your introduction to Dental Blue for Individuals Value 1500 PPO, a comprehensive plan that provides the coverage you need. Plus, you pay less for most services when you see an in-network dentist. You get two checkups and cleanings each benefit period, and there is no cost for preventive services in-network.¹ Blue Cross and Blue Shield of North Carolina (Blue Cross NC) is the most trusted health insurance company in the state² for a good reason – we strive to provide excellent customer service and in-network savings to protect both your oral health and total health.

The Perks of Staying In-Network

When you visit a provider in the Blue Cross NC network, you'll save on out-of-pocket expenses because dentists in our network may not bill more than your portion up front or bill for charges above the allowable amount (unless previously agreed to by you). Out-of-network providers may bill in full at the time of service and for compensation above the allowed amount.

Thanks to our large and growing network, you'll have plenty of options – there are more than 2,700 dental providers with Blue Cross NC,³ and you'll have access to dentists in all 50 states through a national network, GRID+.⁴

Oral Health – It's More Than a Bright Smile

Over 90% of systemic diseases can have oral symptoms.⁵ We understand how oral health affects a person's well-being, so for anyone with diabetes or coronary artery disease, we'll send Care Gap reminders encouraging those members to schedule dental checkups. Just one preventive checkup each year can lead to lower health risks and more than \$515 in annual medical savings per person.⁶ We also offer these special benefits as standard:

- Composite (white) fillings covered on all teeth
- No missing tooth exclusion or limitation
- Sustained release therapeutic injections to minimize the need for opioid prescriptions

Remember, in-network means:

Lower costs

No claims to file

Fully credentialed providers

Finding a provider is as easy as 1, 2, 3
