Description

The Outpatient Code Editor (OCE) is an editing system created and maintained by CMS to process outpatient facility claims. The OCE edits identify incorrect and inappropriate coding of these claims.

The National Correct Coding Initiative (NCCI or CCI) was developed by CMS to promote consistent and correct coding methodologies. NCCI rules look for code pairs that should not be billed together on the same date for the same patient. The hospital procedure-to-procedure (PTP) code pairs operate the same as the practitioner PTP code pairs; however, modifiers and coding pairs may differ because of differences between facility and professional services. Applicable NCCI edits are incorporated into the OCE.

BCBSNC has adopted a subset of the OCE edits and will use these in processing outpatient facility claims.

Policy

Blue Cross Blue Shield North Carolina (BCBSNC) will not provide reimbursement for services identified through the OCE editing system as billing/coding errors.

Benefits Application

This policy relates only to the services or supplies described herein. Please refer to the Member's Benefit Booklet for availability of benefits. Member's benefits may vary according to benefit design; therefore, member benefit language should be reviewed before applying the terms of this policy.

**Policy Guidelines**

BCBSNC reserves the right to implement service edits to apply correct coding guidelines for CPT, HCPCS, and ICD-9/ICD-10 diagnosis and procedure codes. Service edits are in place to enforce and assist in a consistent claim review process.

National Correct Coding Initiative (NCCI) edits are available at: https://www.cms.gov/Medicare/Coding/NationalCorrectCodInitEd/NCCI-Coding-Edits.html

**Billing/Coding/Physician Documentation Information**

This policy may apply to the following codes. Inclusion of a code in this section does not guarantee that it will be reimbursed. For further information on reimbursement guidelines, please see Administrative Policies on the Blue Cross Blue Shield of North Carolina web site at www.bcbsnc.com. They are listed in the Category Search on the Medical Policy search page.

*Applicable service codes: refer to section “OCE Edits”*

**Scientific Background and Reference Sources**

Reimbursement Policy Oversight Committee review 10/26/2015

Outpatient Code Editor (OCE) Edits

Policy Implementation/Update Information

10/30/15   New policy developed regarding Outpatient Code Editor (OCE) Edits. BCBSNC will not provide reimbursement for services identified through the OCE editing system as billing/coding errors. Notification date 10/30/15 for effective date of 12/30/2015. (an)

12/30/16   Routine policy review. Removed edit for invalid sex. (an)

7/28/17    Revised wording for the 4th and 5th items in the OCE Edits table. Item 4: Code 2 of a code pair that is not allowed by NCCI unless an appropriate modifier is appended to Code 2. The procedure is of the column 2 code in a pair of procedures denoted with a modifier indicator of “1”, meaning an appropriate modifier may be allowed to append the code pair and bypass the edit. However, where the medical documentation does not support the use of the modifier on Code 2 of the code pair, the edit will be enforced and Code 2 of the code pair will be rejected. Item 5: Code 2 of a code pair that is not allowed by NCCI even if appropriate modifier is present. The procedure is the column 2 code in a pair of procedures, denoted with a modifier indicator of “0”, meaning no modifier may be allowed to append the code pair and bypass the edit. There are no circumstances in which both procedures of the code should be paid for the same member on the same day by the same provider. (an)

Medical policy is not an authorization, certification, explanation of benefits or a contract. Benefits and eligibility are determined before medical guidelines and payment guidelines are applied. Benefits are determined by the group contract and subscriber certificate that is in effect at the time services are rendered. This document is solely provided for informational purposes only and is based on research of current medical literature and review of common medical practices in the treatment and diagnosis of disease. Medical practices and knowledge are constantly changing and BCBSNC reserves the right to review and revise its medical policies periodically.
